### **QB-GF-50G Full Automatic Aluminum Tube Filling Machine**

#### **Introduction:**

QB-GF -50G Full Automatic Aluminum Tube Filling Machine is widely used in toothpaste, pharmacy industry. It is fit for Aluminum Tube Filling and sealing various kinds of creams, emulsions and oils etc.

QB-GF -50G Full Automatic Aluminum Tube Filling Machine is designed in 12 working station. This Tube Filling Machine has many automatic functions such as: automatic feeding tube, comparative test of color control patch, filling and sealing, printing code and automatic tube output. And it also adopted PLC control system, so that machines work more precise and stable. The parts contacted with materials are all made from stainless steel, and the parts are acid resistant, alkali resistant and corrosion resistant. The pipes are all connected with high speed work carrier. It is high speed, smart and easy to load and unload. Feed valve is easy to clean due to the use of rotary valve. Four sealing modes can be chosen. The precision of location is very high because of the use of high precision tappet gear in translocation system. The adjustable speed is available because we introduced frequency control in translocation motor.

It can be equipped with tube box, airproof chute, protection cover, heat-up chute, automatic feeding equipments etc.

#### **Technical data:**

Electricity Power	220VAC/50HZ
-------------------	-------------

Power	0.75KW
Air supply	0.6MPA
Air consumption	0.3 -0.5M3 /MIN
Filling capacity	I TYPE 5-25 ML Adjustable II TYPE 15-150 ML Adjustable III TYPE 30-200 ML Adjustable
Tube diameter	Φ12 -25 MM
Length	70 -150 MM
Precision	±0.5%
Capacity	30-40 pcs/min
Size	1200X1000X 1600 MM
Weight	300 KG
