QB-ZG-100C Laminated Tube Making Machine

QB-ZG -100C Laminated Tube Making Machine takes advantages of the most advanced technology abroad. We took leading role in overcoming difficulty in welding plastic Laminated Tube in China. Our QB-ZG -100C Laminated Tube Making Machines not only can be used in welding Aluminum Plastic Laminated Tube, but also plastic Laminated Tube. Various Tubes are cut according to Color or Length. It has a good man-machine interface—touch screen and is controlled by PLC system. QB-ZG -100C Laminated Tube Making Machine is easy to operate and adjust with stable performance. Our QB-ZG -100C Laminated Tube Making Machines are specially designed for the Aluminum Plastic Tube welding and plastic Laminated Tube welding. It covers all Aluminum Foil in the sides. The goods can be preserved effectively for a long time due to the high quality welding. It is widely used in the packing of cream or latex, such as toothpaste, food, cosmetic and chemical.

Note: Used with plastic Laminated Tube welding equipment.

Technical Data:

Electricity Power	220VAC , 50HZ
Power	20KW
Capacity	18 m / min, 100 pcs / min

Tube Diameter	25 -40mm , 12.7-22mm , 42-50 mm
Tube Length	65 -200mm
Air Supply	Air Pressure 0.5-0.7MPA, grease removing
Water Supply	Hydraulic Pressure >0.2MPA , Flux :5 -6 L/ min Temperature < 20 °C,Soft Water
Size	2800X1900X 980 MM
Weight	1800 KG
