QP-398D Automatic Powder Packing Machine

Equipments:

Standard Equipment: 398 Host Computer and Spiral Measuring Machine

You can also choose: Spiral Feeder and Finished Products Conveyer

Spiral Measuring Machine Features:

1. Simple structure, reliable operation and easy to maintain
2. Feed by rotary screw, Code by Servo system, control by computer are technical features which are different from other machines. It has the following advantages: Sensitive movement, low noise, stable, reliable, high speed measurement, high precision, easy to clean due to the Open type charging box

Spiral Measuring Machine Technical Data:

Metering system: Screw rotary filling

Packed Weight: 10-5000g, screw can be changed

Measure Range: 1-6000g, resolving power 1

Package Precision:

weight \leq 100g, $\pm\leq$ 0.5-1g

weight: 100-1000g, \pm 0.5%-1%

weight $>$ 100g, $\pm\leq$ 0.25%-0.5%

Packing Speed: 10-50 bags/min

Voltage: 380V, three-phase /220V 50-60HZ, single-phase

Power: 1.5kw

Weight: 80Kg

Cubage of charging box: 50L
